Edition 20.08.2024

Errors and amendments excepted. Our General Terms and Conditions are effective. / WEEE-Reg.-No. DE 69718127

DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Fully upholstered suite, metal base frame

Seat upholstery structure:

Very casual with bay quilting: rubber straps, polystyrene foam VW 35, 80% foam sticks VW 40, 20% silic. hollow fiber, Diolen casual / loose: rubber straps, polystyrene foam VW 35, Diolen

Back upholstery structure with bay quilting: polystyrene foam, 50% foam sticks, 50% duck plumes, Diolen

UPHOLSTERY

With casual upholsteries you rather sit „in the sofa“ than on it, the upholstery snuggles. Two upholstery versions are available:

Very casual: A particularly casual upholstery is characterized by a very comfortable and soft surface. Even when new or after initial use, the covers can show a clearly visible wave pattern on the seat, back and armrests, which is unavoidable due to the design, construction and material and will increase with use. The size of the sewn covers also has a similar influence on sinking and cover stretching. The softer the upholstery and the larger the seat surface, the greater the sinking in and ultimately the cover stretching.

Bay quilting:

This high quality upholstery with bay quilting contains a flexible mixture out of loose filling material as foam sticks and/or plumes that enables a point adaptation to the body. For this the fillings are worked in separate bays that according to the cover come more or less apparent. Sitzmarks are due to model and design typical.

casual / loose: A casual/loose upholstery is characterized by a smooth upholstery structure. The cover is not waveless. The intended ridge of the covers on seat, back and armrests as well as sitzmarks due to model and design are typical.

Slight differences in seat firmness with add-on groups are according to construction and therefore constitute no reason for complaint.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

FUNCTIONS

I FUNCTIONAL ARMREST

The armrests are adjustable by a ratchet mechanism that allows different positions. By pulling beyond the highest position the armrest can be returned to the basic position (armrest lies on the corpus again).

Please note: Armrests with ratchet mechanisms must not be used as seat in the folded up state. The joints are not designed for use with the entire weight of the body.

II FUNCTIONAL HEAD PIECE

The head piece is manually adjustable by a ratchet mechanism that allows different positions.

III BACK ADJUSTMENT

Independently of the head piece the back is adjustable by a ratchet mechanism that allows different positions.

LEGS

Metal runner optional available in:

- nickel satined (stainless steel optics)
- powder-coated mat black

from the left to the right:

NECK CUSHION

Neck cushion with affixed counter weight (without magnet) for additional seat and lying comfort.

Errors and amendments excepted. Our General Terms and Conditions are effective.

FOOTREST

optional, motor-driven footrest with manual folding function FKM (version with rechargeable battery = FKMA)

A motor-driven adjustable footrest can be installed as additional relax function (extra charge see price sheet).

By short touch of the front TOUCH-IT sensors (until the beep sounds) the footrest moves to the edge of the seat and stops. By afterwards permanently pressed sensor the footrest moves to the end position.

For optimal seat- and lying comfort it can also be folded out manually in addition. Thereby the seat- and total depth is enlarged.

By constant actuation of the back sensor the footrest returns completely to the basic position under the seat (must be folded in before).

The TOUCH-IT sensors are attached to the respective armrest side.

In case of contact with an obstacle the motor stops for safety reasons and moves back approx. 4 cm. When unfolded the front part of the footrest has an overload protection. If the load is too high the rest bends downwards but can be brought back to the basic position without great effort. The complete area of the footrest can be loaded with approx. 35 kg.

As an alternative to the version with mains current the footrest can also be supplied **with rechargeable battery (article FKMA)**.

When ordering the respective footrest (49 x 48 cm respectively 34 x 48 cm) is automatically assigned and delivered suitable for the sofa respectively add-on element.

The footrest can be installed with the following elements:

- **single sofas with 2 AR**
- **add-on elements with 1 AR**
(only at the respective armrest side)

Please note: With seats without armrest and with daybeds the footrest can't be installed according to the construction.

When ordering please indicate below which element and as the case may be below which seat (standing in front left or right side or both-sided) the footrest is desired

A later fitting is unfortunately not possible.

SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as felled seams or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

COVERING MATERIALS

You may find the information concerning the specific properties of the covering materials on the sample labels.

INDICATIONS OF DIMENSIONS AND REQUIREMENTS

All the values given are approximate values: dimensions in centimetres, material requirements in metres, leather requirements in square metres.

ORDER CHECK LIST

Please pay attention to the following issues respectively to complete indications when ordering:

- **combination**
- **covering material**
- upholstery **very casual** or **casual / loose**
- **finish of metal runner**
- **optional footrest - FKM or FKMA**, also **element and if necessary below which seat** (standing in front left or right side or both-sided)

Errors and amendments excepted. Our General Terms and Conditions are effective.

WITH FUNCTIONAL BACK Elements with functional armrest and double adjustable back. By folding the back the total height is reduced up to 20 cm, the total depth is enlarged up to 31 cm and the seat depth up to 4 cm. SD with daybed P: min.126 cm, max. 130 cm.
