### Birch heartwood Haarma

Birch is one of the most fascinating natural materials that inspires us again and again. With its soft, light surface and graphic grain, it is of particular beauty. But above all, their wood is characterized by durability, flexibility, tear resistance and robustness. Due to its cold-resistant properties, it was the first tree to colonize the soil after the Ice Age. Even „Ötzi“ kept his most valuable everyday companions in containers made of birch bark.

### application bark of birch

To preserve this wonder of nature, we strip the bark for our back-fronts from the living tree so it can regenerate. Moss or verdigris can usually still be seen on these untreated originals. The wood for our new Alva range also comes from forests where only as much is cut down as can grow back.

Due to the design, the LED strips are not interchangeable, as they are firmly attached to carrier profiles such as e.g. aluminum profiles and must be glued. In this way, we guarantee a consistently long service life for our lights. We reserve the right to make technical changes to the model and dimensions! Models protected by law! Due to different designs and functions, the dimensions specified on the order confirmation may vary slightly in individual cases.

### Sustainable raw materials

We only harvest our solid wood from sustainably managed forests and we use special water-based paints that protect the environment.

### Made in Germany since 1911

We are the third generation to produce in Münsterland and are committed to the quality concept „Made in Germany“.

### Experienced staff

We employ more than 100 employees who are not only well trained, but also enjoy working for us and have been loyal to us for a long time.

### Climate-friendly production

Hartmann uses **solar energy** for electricity, heats the production halls with **leftover wood**, reuses **water** and is committed to the **1.5-degree UN target** in the furniture industry's climate pact.

### Health & security

Our solid wood furniture is particularly **low in pollutants**, has an **antibacterial** effect and complies with all legal safety standards.

### Longevity

Nothing is more sustainable than buying furniture only once. This is ensured by their timeless design, the care for wood and leather and their repairability.

### Tree planting project

When it comes to **sustainability**, Hartmann shows **full transparency**. We plant a new tree for every tree used in production.
