Trend material concrete

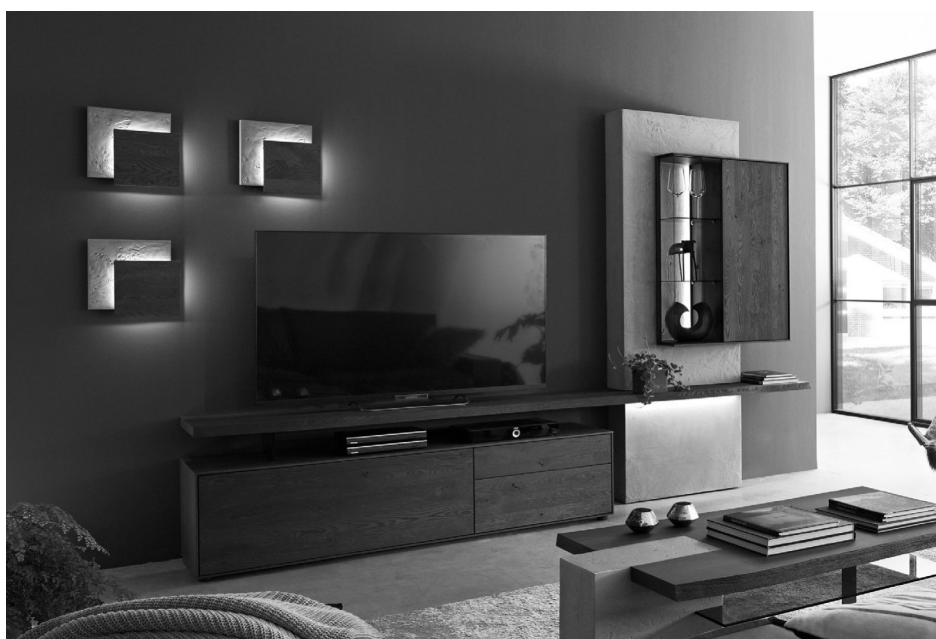

The special filling technique creates a fascinating concrete look. In thin layers, the concrete is applied by hand, sanded and painted. This gives it its unique tension and pleasant feel.

Product-typical unevennesses, depressions, crater structures and slight hairline cracks make each concrete block unique.

ATTENTION:

The glass elements are parsol bronze.

product information:

Trend material concrete

The special filling technique creates a fascinating concrete look. In thin layers, the concrete is applied by hand, sanded and painted. This gives it its unique tension and pleasant feel.

Product-typical unevennesses, depressions, crater structures and slight hairline cracks make each concrete block unique.
