DESIGN

CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/4.

Functional armchair, metal base frame

Seat upholstery structure: zig-zag springs, Dacron, pocket barrel spring, polystyrene foam VW 40, Diolen

Back upholstery structure: Dacron, polystyrene foam, Diolen

UPHOLSTERY CASUAL / LOOSE

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A casual/loose upholstery is characterized by a smooth upholstery structure. The cover is not waveless. The ridge of the covers on the seat, back and armrests as well as sitzmarks due to the model and design are typical.

BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

ERGONOMICS

In each version the armchair is available in the 3 sizes S, M, L. All relevant comfort sizes (seat height, seat depth, length of the leg flap, back height) are expanding in due proportion, adapted to all body measurements.

S
up to ca. 165 cm

M
from ca. 165 up to 183 cm

L
from ca. 183 cm

SEAM

Depending on the model, the seam on leather covers may be different from fabric covers, especially on fitted items. Decorative leather seam (as felled seams or double seams) may be omitted depending on the model according to suitability of the fabric covering material.

The model is only worked with selvedge seam.

Constructive structure and elected materials ensure that the standards of the quality assessments and test instructions of RAL-GZ 430 are achieved. Our products are designed for a max. static loading of 125 kg per seat.

Edition 28.08.2024

Errors and amendments excepted. Our General Terms and Conditions are effective.

FUNCTIONS

I FUNCTIONAL HEAD PIECE

The head piece can be adjusted by a ratchet mechanism that allows different positions. By pulling beyond the highest position the head piece can be returned to the basic position.

II FOLLOWING ON ARMRESTS

Ergonomic, following on armrests that adapt automatically to the respective seat or lying position.

III RELAX FUNCTION

Integrated seat adjustment: Back and leg part can be adjusted separate of each other for a comfortable relax position into a lying position.

MOTOR-DRIVEN RELAX FUNCTION

VS2, VM2, VL2

By operation of the sidewise fixed control panel (standing in front on the left) the back and the leg part can be adjusted infinitely separate of each other into a lying position.

The motor-driven relax function is actuated by mains current. It can also be delivered with **rechargeable battery** against extra charge.

MOTOR-DRIVEN RELAX FUNCTION WITH LIFT-UP FUNCTION

VS4, VM4, VL4

In addition to the motor-driven adjustment with this version a useful stand up assistance (LIFT-up function) is integrated. Instead of the control panel a cable hand switch is delivered with which all functions can be operated.

The armchair is not rotatable in the moved out LIFT-up position.

Only with mains current (**rechargeable battery is not possible**).

Please note: Do not sit on the raised leg part. The joint is not designed for use with the entire weight of the body.

The leg part of the armchairs with LIFT-up (V4) has an angle of 30° compared to the motor-driven version (15°).

IV COMFORT PACKAGE MASSAGE

Optional a comfort package consisting of massage program and a lordosis support can be integrated against extra charge (see price sheet).

It can be chosen between an undulating massage program and a lordosis support via control panel (standing in front on the right). During the massage process the lordosis function can not be activated.

The massage process takes 10 minutes. The following reset time is ending after approx. 5 minutes. Then the program can be switched on again.

Only with armchairs with mains current (**rechargeable battery is not**

LEGS

- No. 1. Metal rotary plate stainless steel, lightly curved

- No. 2. Metal rotary plate stainless steel with upholstered core (partially covered), lightly curved against extra charge see price list

- No. 3. Wooden rotary plate beech natural and in stain colours walnut, wenge and black, lightly curved

- No. 4. Stellate leg optional metal nickel satined (stainless steel optics) or metal powder-coated structural black mat

- No. 5. Stellate leg aluminium shiny (polished)

All tethered relax versions (with mains current) are possessing a turn limiter. These avoid that the electric cable wraps around the frame. Rotatability of these armchairs is approx. 320°. Relax versions actuated by rechargeable battery are rotatable by total 360°.
